

Pujari Lakshmi Prasanna

Kadapa, Andhra Pradesh, India | pujarilakshmiprasanna152@gmail.com | 9347453411

Professional Summary

Motivated Computer Science Engineering student with hands-on experience in full-stack web development, specializing in React.js, JavaScript, Python, and MySQL. Built real-world projects like Care-connect Healthcare Appointment Assistance system , a platform with real-time doctor availability and booking functionality. Strong in web technologies, problem-solving, and scalable application development. Seeking entry-level Software / Web Developer roles with immediate availability.

Education

B.Tech - Computer Science & Engineering	2022 - 2026
Sri Padmavati Mahila Visvavidyalayam, Tirupati	
Intermediate - M.P.C	2020 - 2022
Govt. Junior college for girls,Kadapa	
SSC	2020
Sri Guru Raghavendra High School,kadapa	

Skills

Languages: Python3, JavaScript

Web Technologies: HTML5, CSS3, React.js, Bootstrap

Backend & Database: Flask, MySQL

Tools: Git, GitHub, Visual Studio Code, Canva, AI Coding Assistants

Soft Skills: Adaptability, Time Management, Team Collaboration, Leadership, Problem Solving

Experience

Full Stack Web Development Intern- Sure Trust Oct 2025 - Apr2026

- Developed responsive web applications using modern frontend technologies.
- Implemented UI/UX improvements, enhancing user experience and performance.
- Applied full-stack concepts, including frontend-backend integration.
- Collaborated in a structured development environment, improving code quality and efficiency.

Community Service Project: - Public Survey (6weeks):

- Executed a 6-week community needs survey,gathering data from citizens on public problems, which was used to directly inform 2 local improvements strategies.
- Learning Improvement Program (2weeks): Directed a 2-week Learning Improvement program in a local school, directly enhancing educational engagement for students and improving their baseline scores .

Projects

Care Connect – AI Healthcare Appointment System github.com/LakshmiPrasanna152/care-connect

- Built a full-stack healthcare appointment system with **real-time doctor availability and booking functionality**.
- Integrated an **AI chatbot** to guide users and assist with symptom-based interactions.
- Developed an **NLP-based symptom checker** to recommend appropriate medical specialists automatically.
- Implemented **secure authentication and role-based dashboards** for patients and doctors.
- Designed a **responsive web application with automated notifications** for appointments.

ML Supervised Learning Studio -Interactive Web service github.com/LakshmiPrasanna152/supervised_web

- Developed an **interactive machine learning web app using Streamlit** to train, evaluate, and visualize multiple supervised learning models in real time.
- Implemented **end-to-end ML pipeline** including data preprocessing (scaling, PCA), model training, and prediction workflows.
- Built **comprehensive evaluation dashboard** with metrics , confusion matrix, cross-validation, and feature importance analysis.
- Enabled **real-time predictions and advanced visualizations** (scatter plots, pair plots) for exploratory data analysis and model insights

Certifications

ChatGPT102: Prompt Engineering and Advanced ChatGPT - edX

Artificial Intelligence Fundamentals - IBM SkillsBuild

The Joy of computing using python - NPTEL

The Java Language -Coursera

Leadership

Student voluntary - Virinchi2k26

- Led organization of a national-level cultural event
- Managed cross-functional teams and event execution
- Demonstrated strong leadership, coordination, and project management skills

Hobbies

Exploring AI Tools,Reading Novels, Crafts & Crochet
